

About Me

I am a highly motivated and creative high school student currently enrolled at Riverton High School and the Web Design program at Jordan Academy for Technology and Careers (JATC). I've gained valuable hands-on experience through my internship with Rose Creek Elementary. Through my JATC program, I have developed a strong foundation in web design principles, such as user experience, accessibility, and responsive design. I have also learned various web design tools and technologies, including HTML5 & CSS3 and an introduction to Javascript. I am eager to bring my skills and experience to a new challenge and to continue learning and growing as a web developer.
